Carmichael number 561

Canonical name	CarmichaelNumber561
Date of creation	2015-07-12 6:12:21
Last modified on	2015-07-12 6:12:21
Owner	akdevaraj (13230)
Last modified by	akdevaraj (13230)
Numerical id	1
Author	akdevaraj (13230)
Entry type	Definition

561 is the smallest Carmichael number in the ring of integers. However it is only a pseudoprime in the ring of Gaussian integers. We can use pari to find the bases to which 561 is a pseudoprime. I found it is pseudoprime to bases $12 + i$, $22 + i$, $33 + i$ and $44 + i$. Needless to say it is a pseudoprime to other bases too. More on this later.
